

CURRICULUM and STUDENT SUPPORTS

In order for students learning experiences to be the best they can, the school has to enable curriculum and student supports, that will allow all learners with different abilities, capabilities and disabilities to succeed.

This school takes the view that the curriculum must be enriched with quality supports and takes the position of:

- having Reading Recovery as a constant intervention
- reporting to parents to ensure support for the learner
- feedback to students through monitoring and marking
- student achievement information
- quality library experiences
- in depth support for students with special needs
- organised and varied sports and E.O.T.C. experiences

All these are carried out as Good Practice and can be found in our Good Practice folder.
